a/ "Fragile Situations" have: either a) a harmonized average CPIA country rating of 3.2 or less, or b) the presence of a UN and/or regional peace-keeping or peace-building mission during the past three years. This list includes only IDA eligible countries and non-member or inactive territories/countries without CPIA data. IBRD countries with CPIA ratings below 3.200 do not qualify on this list due to non disclosure of CPIA ratings; IBRD countries that are included here qualify only by the presence of a peacekeeping, political or peace-building mission - and their CPIA ratings are thus not quoted here

b/ Specifically defined as the presence of a UN and/or regional (eg: AU, EU, OAS, NATO) peace-keeping operation in this country in the last three years, with the exclusion of border monitoring operations [sources: UN DPKO, AU, EC, websites] For additional information regarding this list, please read the FCS Information Note and FAQ found on our website: www.worldbank.org/fragilityandconflict

Notes:

a/ "Fragile Situations" have: either a) a harmonized average CPIA country rating of 3.2 or less, or b) the presence of a UN and/or regional peace-keeping or peace-building mission during the past three years. This list includes only IDA eligible countries and non-member or inactive territories/countries without CPIA data. It excludes IBRD only countries for which the CPIA scores are not currently disclosed. This is an interim list and the World Bank will continue to work on improving and refining our understanding of fragility. This definition is pursuant to an agreement between the World Bank and other MDBs at the start of the IDA 15 round in 2007 (only the ADB & AfDB use CPIA ratings).

b/ "Core" fragile states are those states with a WB CPIA rating of 3.0 or below. "Marginal" fragile states have scores greater than 3.0 but less than 3.2. These are included purely on the basis that these categories define certain HR benefits within the Bank and are for internal use only. *Certain countries are included on this list for this reason only as they otherwise would not meet the criteria for inclusion.* For more detail, please refer to link below:

FY06 LICUS List (Low-Income Countries Under Stress)

Low-Income Countries Under Stress (LICUS) are identified by weak CPIA ratings. They cover a spectrum of fragility, including countries with deteriorating governance, those in prolonged political crisis, post-conflict transition countries and those in gradual but still fragile reform processes.

In order to target its efforts and monitor implementation of the LICUS Initiative, the Bank defines LICUS as those countries that score lowest on the average Country Policy and Institutional Performance Assessment (CPIA) and governance average of the CPIA, as well as non-member territories and those countries without CPIA data. "Severe" LICUS score lowest within this grouping. The marginal group scores on the edge of what is considered LICUS and is on the list for monitoring purposes only.

CPIA rankings are revised annually and the quintile-based ratings are available to the public (including on IDA's external web site - in section "How IDA Resources Are Allocated", <http://www.worldbank.org/ida/idalloc.htm>).

The Board has directed that the Bank not release a public LICUS list to avoid branding countries, particularly those at the more stable end of the spectrum. The Bank therefore does not publish a LICUS list, but maintains an internal list to guide support to strategy development and implementation, and monitoring of human and budget resources. For the reasons stated above, the list should be used with caution and should not be disseminated widely.

FY08 LICUS List

LICUS countries are identified by weak Country Policy and Institutional Assessment (CPIA) ratings. They cover a spectrum of fragility and these include; countries with deteriorating governance, states in prolonged political crisis, post-conflict transition countries and those undergoing gradual but still fragile reform processes.

The Bank defines LICUS as (i) low income countries with overall CPIA and governance average of the CPIA ratings of 3.2 or less, (ii) non-member territories and countries without CPIA data. The 'marginal LICUS' group scores on the edge of what is considered LICUS and is on the list for monitoring purposes only.

CPIA rankings are revised annually and the ratings are available to the public (including on IDA's external web site - in section "Performance Assessments and Allocation of IDA Resources", "IDA Resource Allocation Index 2006" <http://www.worldbank.org/ida/idalloc.htm>).

The Board has directed that the Bank not release a public LICUS list to avoid branding countries, particularly those at the more stable end of the spectrum. The Bank therefore does not publish a LICUS list, but maintains an internal list to guide support to strategy development and implementation, and monitoring of human and budget resources. For the reasons stated above, the list should be used with caution and should not be disseminated widely.
